

Member Tested and Recommended Program

Thursday, March 04, 2010

Thank you for participating in our “Member Tested and Recommended Program.” The 45 **AUTO+P 200 GR TAP CQ** has been tested and recommended by the members of the National Tactical Officers Association. Your overall score was a **5**. The NTOA Member Tested and Recommended logo may be used solely on the specific product that was tested.

Attached with this letter, is the Member Tested and Recommended Logo which can be used on all marketing pieces for this product. Also attached is a copy of the complete reviews that your company can use as well.

Press releases written regarding this product review must be emailed to NTOA for review before release.

Since the review is completed, it will now be added to online Member Tested product database. To make the review complete, please send us a digital image of the product that has been tested. This is now listed on the NTOA’s Member Tested and Recommended online database and review will soon be published in *The Tactical Edge* journal.

Please contact Corey Luby at advertising@ntoa.org if you would like to advertise in *The Tactical Edge* journal. Once again, thank you for participating in the Member Tested and Recommended Program©.

Thank you,

Corey Luby

I received 20 rounds of Hornady .45 Auto 230gr TAP CQ ammo Hollow Point ammunition for testing and evaluation. Having used this ammunition prior to the test, the Hornady ammunition was a not a new experience for me. I was very impressed with the ammunition. I used a Glock Model 21, .45 caliber, semi-automatic pistol as the test weapon. The rounds were fired at an outdoor firing range. The targeting system was an IPSC five target. The rounds produced little muzzle flash, low amount of muzzle lift (kick) and were very accurate. Unlike other ammunition, I did not have gun powder residue build up on my hands after firing the ammunition. I was able to fire one inch groups from ranges of 7, 10, 15 and 25 yards. Of the Twenty rounds fired, I had

20 rounds of Hornady 45+P 200gr. TAP CQ ammunition were tested. 10 rounds were fired through a Glock Model 21 (issued duty weapon) and 10 rounds through a Glock Model 31 (optional back-up/off-duty weapon). The ammunition performed well with no feeding or misfire problems. There was no noticeable increased recoil from the 200gr. ammunition compared to 185gr. Bullet expansion was consistent along with manufacturing quality of each round. I give this ammunition a 5 overall and highly recommend it to agencies and officers. Performance was noticeably better compared to our current issued ammunition.
